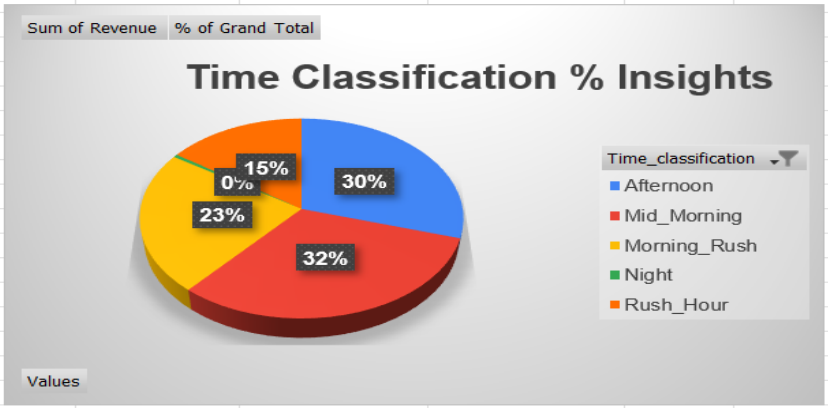
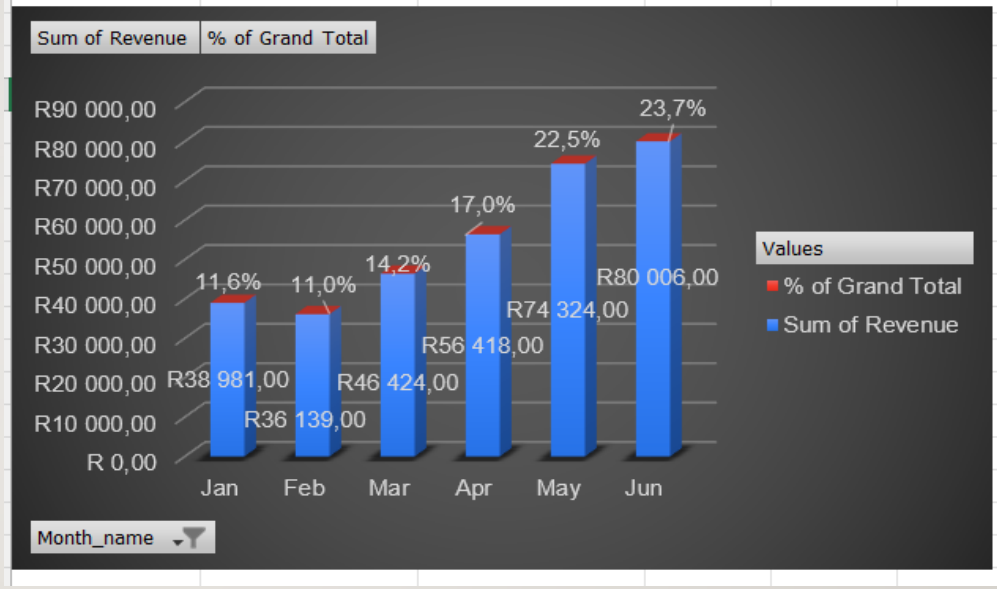
Night	R1 583,00	0,4%
Rush_Hour	R50 575,00	15,0%
Grand Total	**R332 292,00**	**100,0%**



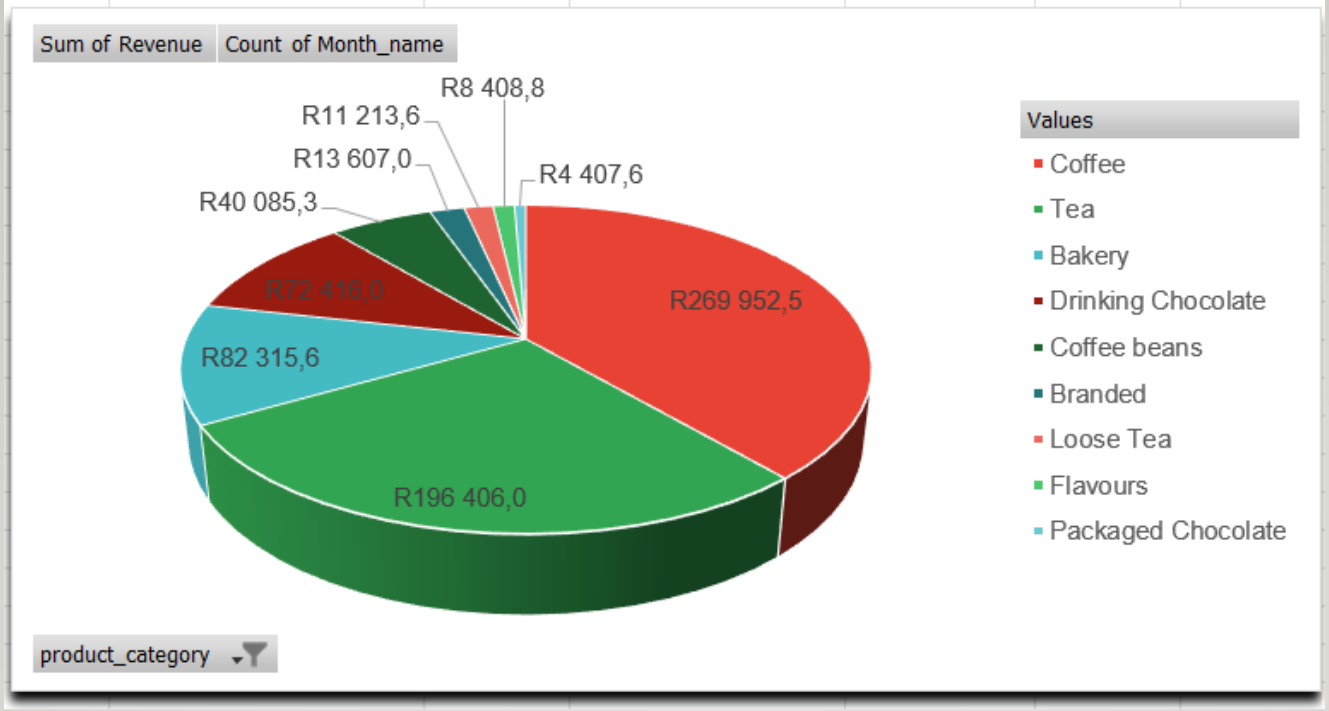
Row Labels	Sum of Revenue	% of Grand Total
Jan	R38 981,00	11,6%
Feb	R36 139,00	11,0%
Mar	R46 424,00	14,2%
Apr	R56 418,00	17,0%
May	R74 324,00	22,5%
Jun	R80 006,00	23,7%
Grand Total	**R332 292,00**	**100,0%**



Key Insight

Sales show a strong upward trend from January to June **from (12% to 24%).**
June is our top-performing month with **24% revenue**, followed closely by May with **23% revenue.**
Mid-Morning period delivered the strongest performance.

MONTHLY PRODUCT TRENDS



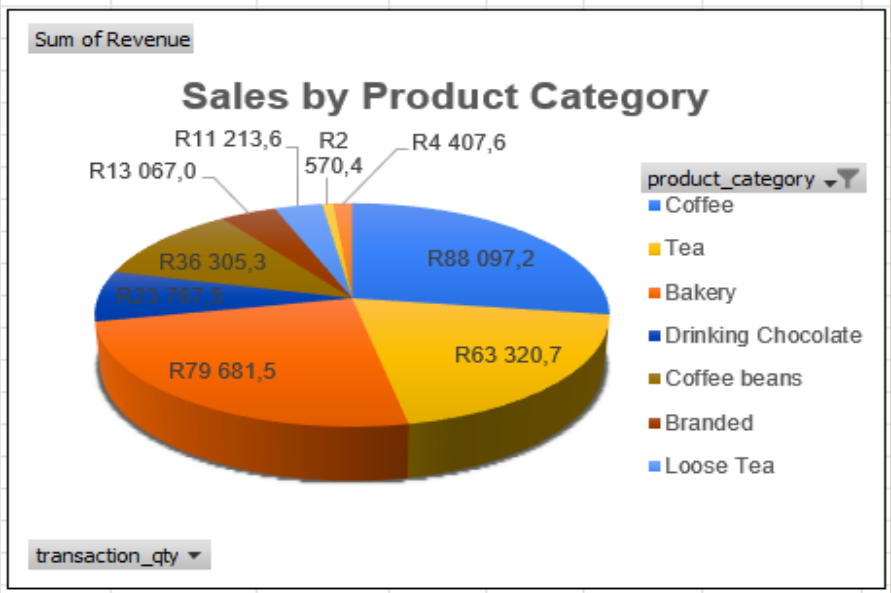
Key Insight

Coffee consistently leads all products in revenue generating **39.2%** showing strong and steady growth from January to June., Tea comes behind at **30,1% revenue.**

Loose tea, flavours, packaged chocolate are our bottom 3 performing products contribute a combined **3.4% of monthly revenue** across all months.

SALES BY PRODUCT CATEGORY

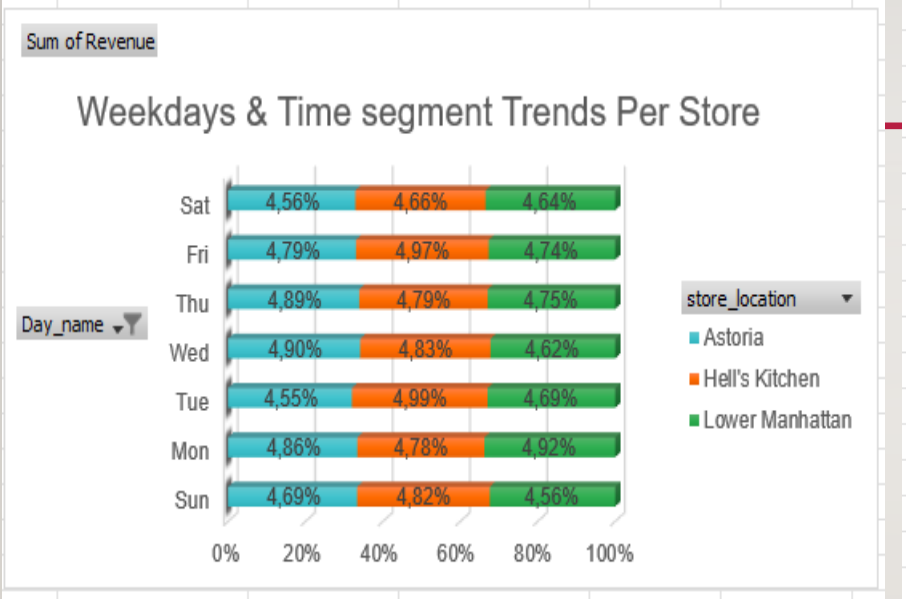
- COFFEE DOMINATES SALES
- PASTRIES SECONDARY
- BEVERAGES PERFORM CONSISTENTLY

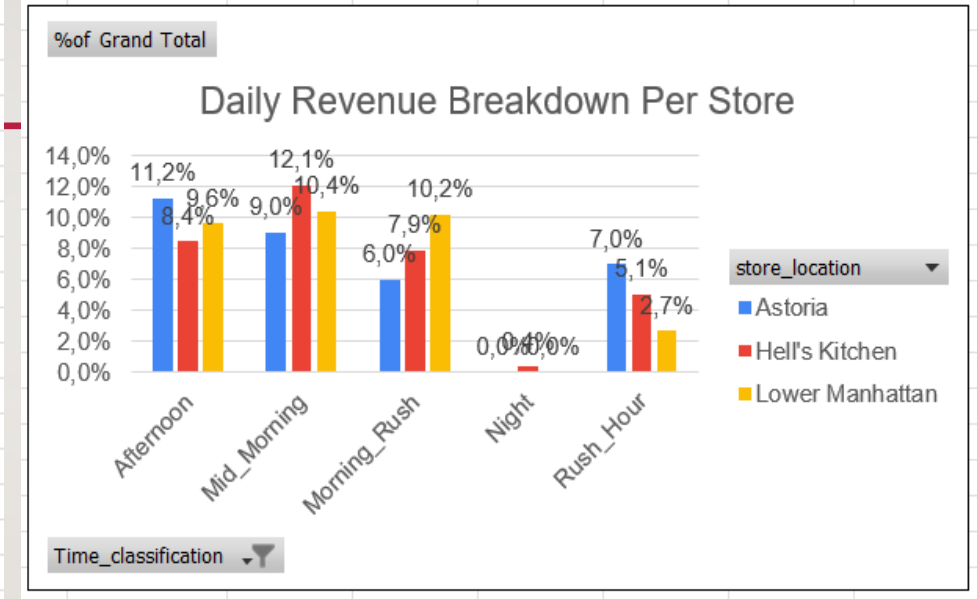


Key Insight

Sales are heavily concentrated in a few high-performing product types, with Coffee (88,097.2), Bakery (79,681.5), and Tea (63,320.7) leading total revenue. This indicates a strong customer preference for premium and specialty beverages

WEEKDAYS & TIME SEGMENT TRENDS PER STORES





Key Insight

Monday and Friday are the top performing weekdays ranged between **14.5% to 14,6%** with Lower Manhattan leading on Monday **(4.9%)** and Hell's Kitchen leading on Friday **(5.0%).**

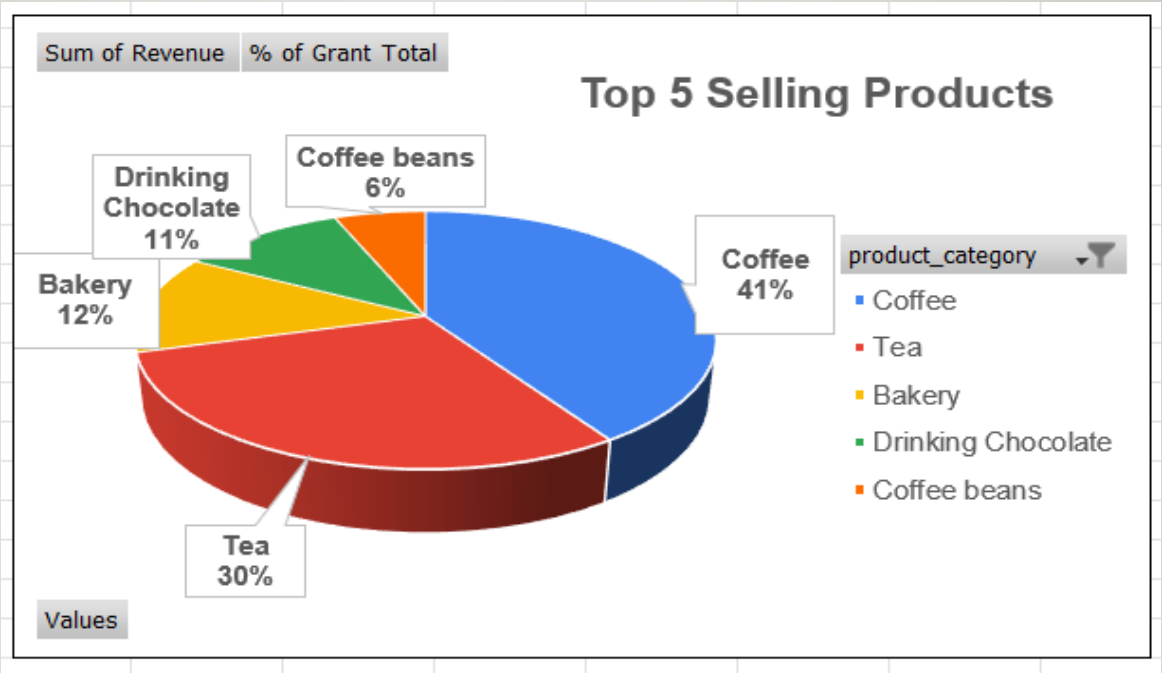
Sales are slightly lower across all stores on weekend ranged between **4.6% to 4.8%** .

All Store performance peaks during the morning drive, Lower Manhattan leading at **12.01%**, followed closely by Hell's Kitchen at **00%.**

Rush-Hour and Night hours across all stores, indicating inactive operating hours contributing **15%**

TOP 5 SELLING PRODUCTS

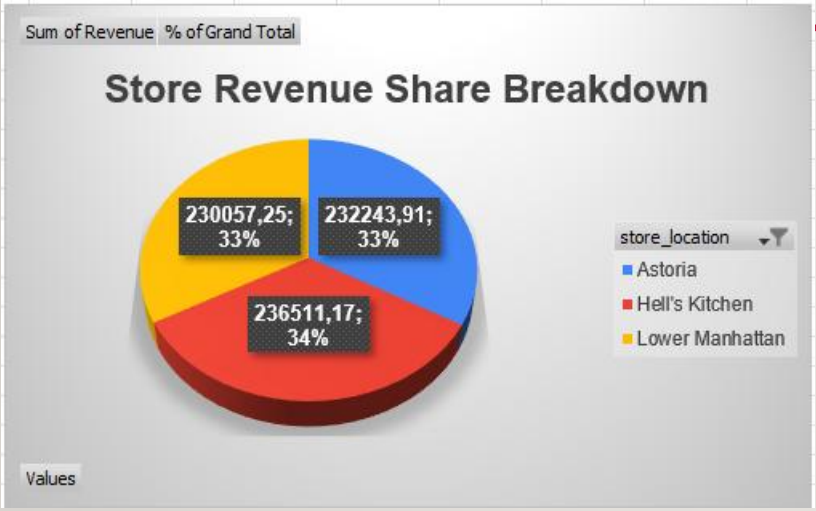
- Coffee
- Tea
- Bakey
- Drinking Chocolate
- Coffee beans

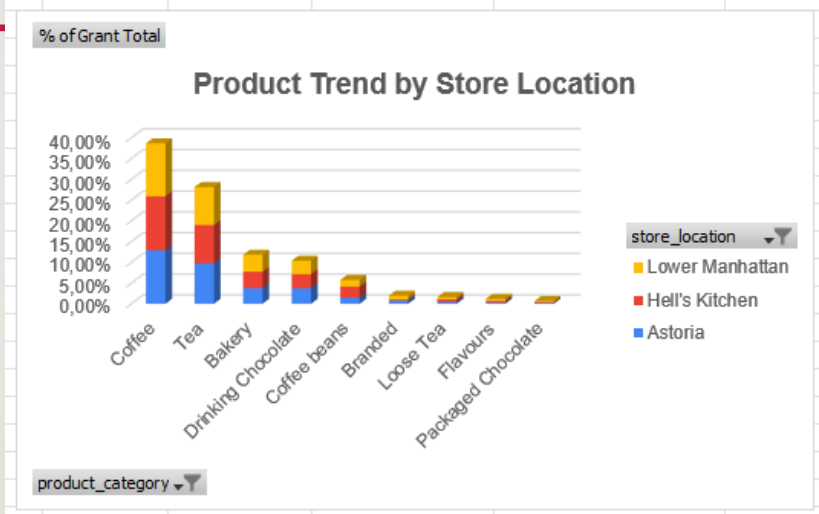


Key Insight

Sales are heavily driven by coffee and tea, contributing over 70% of revenue. While this shows strong performance in core products, it also highlights an opportunity to grow our secondary categories through targeted promotions and bundling strategies.

STORE LOCATION TRENDS

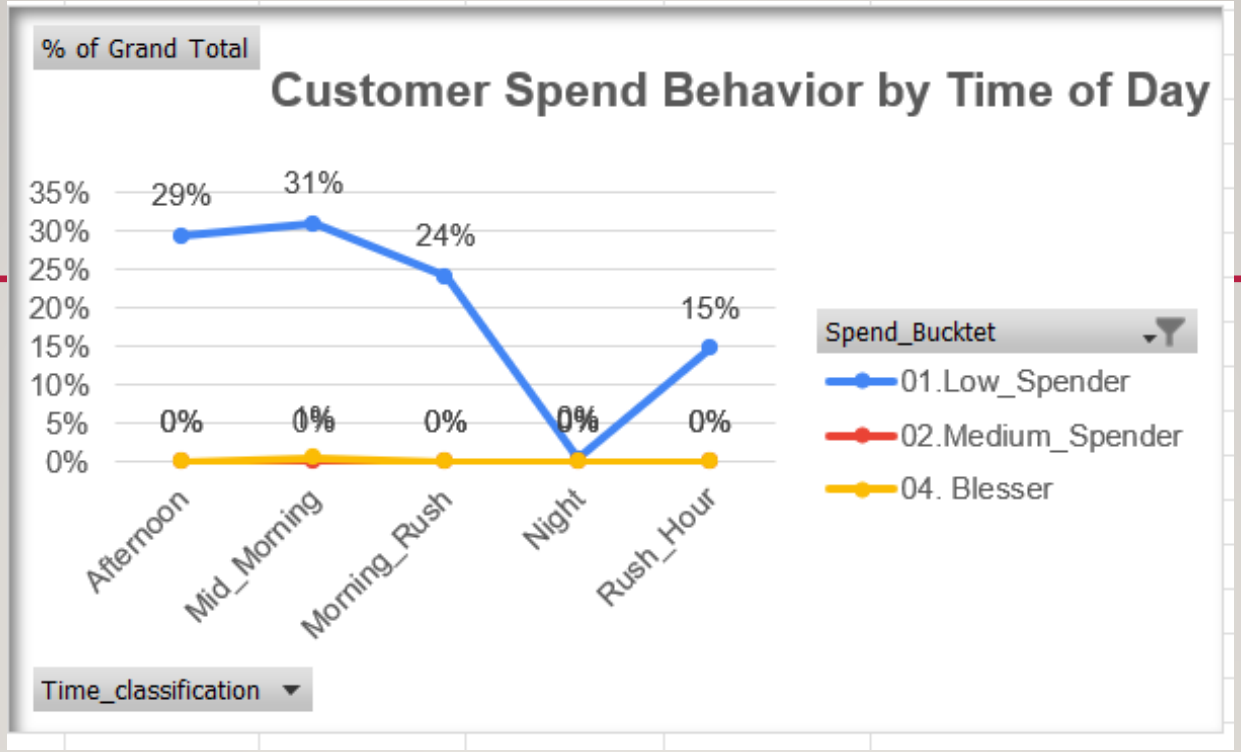




Key Insight

Hell's Kitchen leads in total revenue makes it our top store holding 34%, followed by Astoria at 33% total revenue.
Coffee is the top-seller in all locations, Hell's Kitchen leads in coffee revenue contributing 13.1%, Astoria follows closely with 12.8% revenue.
Tea ranks second, making up 28.1% of total sales, Astoria leads in tea revenue contributing 9.7% .
Loose Tea, Flavours, and Packaged Chocolate have low sales, contributing just 3.4% of total sales across all store.

PEAK SALES TIME ANALYSIS



Key Insights

Sales are heavily concentrated in Mid-Morning and driven by Low Spenders
Mid-Morning contributes the highest share (31%)
Afternoon (29%) and Morning Rush (24%) follow closely
Low Spenders dominate nearly 100% of sales activity
Night shows zero engagement across all segments

RECOMMENDATIONS

.Product Optimization

Increase stock levels of **top-performing products** to avoid stockouts during peak hours
Position these items prominently (menu boards, counter displays)
Create **premium versions or upsells** (e.g., larger sizes, add-ons like extra shots or flavors
Most coffee shops generate a large share of revenue from a small number of products — scaling these gives the fastest return

. Fix Underperforming Products: Low-performing items are costing space and attention

Identify bottom 20% products by revenue Improve them (better pricing, bundling, visibility), OR Remove them completely from the menu OR,
Alternately Bundle weak products with best-sellers (e.g., pastry + coffee combo)

Maximize Peak Hour Revenue: The busiest times are the biggest opportunity.

Increase staffing during peak hours to reduce waiting time
Introduce fast-service options (pre-made items, express line)
Push high-margin items during these hours
👉Turn dead hours into revenue-generating periods instead of wasted capacity
By: Run time-based promotions (Like Happy Hour" discounts, Buy 1 Get 1 Free)

⚙. Improve Operational Efficiency: Revenue isn't just about sales — it's also about speed

Reduce preparation time for popular items
Standardize processes during busy hours
Train staff based on peak-time demand patterns

CONCLUSION

This analysis demonstrates that adopting a data-driven approach is essential for improving overall business performance at Bright Coffee Shop. By focusing on peak trading hours and prioritizing top-performing products, the company can maximize revenue and operational efficiency.

However, sustained success will depend on continuous monitoring of sales patterns and product performance, enabling the business to adapt quickly to changing customer behavior and maintain long-term growth.
